

System Design Advantage, LLC Earns CompTIA A+ Authorized Service Center Status

Minneapolis MN, August 11, 2011 – System Design Advantage, LLC announced today that its commitment to quality service and professionalism has been recognized by the leading trade association for the world's information technology (IT) industry. The Computing Technology Industry Association (CompTIA) has designated both System Design Advantage repair centers (Eagan, MN and Lockbourne, OH) as an CompTIA A+ Authorized Service Center. This recognition complements SDA's standing as an OEM Authorized Service Provider (ASP) for HP, Lenovo, Epson, OKI Data, IBM, Fujitsu, PrehKey Tec, Xerox and others.

Designation as a CompTIA A+ Authorized Service Center is validation that a computer service center has achieved the technology industry's highest recognized level of competence, said Cathy Alper, Director Member Communities at CompTIA. It is a strong sign that the professionals of System Design Advantage take pride in their work and are committed to advancing the quality of their operations and service.

The CompTIA A+ Authorized Service Center program recognizes computer, network, server printer and document imaging support businesses that employ certified technicians. These certifications are recognized around the world and throughout the IT industry as the foundation-level skills standards for technology professionals.

To achieve status as a CompTIA A+ Authorized Service Center, at least 50 percent of the service center's technical staff must be CompTIA A+ certified. CompTIA A+ certification is the IT industry's recognized skills benchmark for entry into a technology career. Earning CompTIA A+ certification demonstrates a technician has a broad base of knowledge and competency in core hardware and operating system technologies, including installation, configuration, diagnosing, preventive maintenance, and basic networking.
